

Seals cleaning device

Function

The cleaning device for seals is utilized to remove dirt and silicone oil from the seals. Cleaning the seals prevents them from sticking together and helps to ensure proper seals loading. Komax generally recommends that you clean all types of seals prior to processing them. You can set the desired drying time with the built-in timer.

Items included in the delivery

- Cleaning device
- Drum
- Micro-fiber cloth
- Power supply unit
- Adaptor for mains 115V

Technical data

Capacity	about 2 liters
Speed	approx. 28 rpm
Power Supply	100–240 VAC 50/60 Hz
Dimensions	225 × 280 × 335 mm

Your benefits

- No blocking of the seals feeder system
- No more interruptions in operations
- Washing drum can be used right on the seals module
- Timer controlled
